## PURCHASE ORDER AND DELIVERY ORDER

### 2) Create DO based on Invoice

- In an Invoice, create a button “Create Delivery Order”

Suggestion of placement button for “Create Delivery Order”

When button is clicked all the information details should be taken from the invoice.

### 3) Create DO based on PO

Process Flow

## PURCHASE ORDER AND DELIVERY ORDER

- In PO create a button “Create Delivery Order”

The screenshot displays the JsuitesCloud POS interface. On the left is a sidebar menu with options like Dashboard, Sales, Stock, Job Sheet, CRM, File Manager, Project, Accounts, Promo Codes, Data & Reports, Miscellaneous, E-Commerce, HRM, FWMS, and Scheduler. The main area shows a Purchase Order for PO#1002. At the top of the main area, there is a row of action buttons: Edit Order, Make Payment, Send, SMS, Print Order, Public Preview, Change Status, and Cancel. Below this row, a red box is placed above the JsuitesCloud logo, indicating the suggested placement for a 'Create Delivery Order' button. The order details include the company name JSOFT SOLUTION SDN BHD, the bill from Mr. Ryan, and a table of items. The table has columns for #, Description, Rate, Qty, Tax, Discount, and Amount. It lists one item: 1 Headphones, with a rate of MYR 5.00, quantity of 3.00, and a total amount of MYR 15.00.
